ABOUT ME

Fresh graduate in Software Engineering from Telkom University with a strong interest in web development, backend systems, data processing, and application performance testing. Experienced in developing and maintaining web applications using modern technologies such as Next.js, React, Express.js, Laravel, and PostgreSQL, as well as building REST APIs and integrating third-party services. Familiar with database design, authentication, responsive UI development, and performance optimization. Experienced in using development and monitoring tools including Git, Docker, AWS, Grafana, Prometheus, and K6. Able to work independently and collaboratively in a team, communicate with clients to understand requirements, troubleshoot technical issues, and deliver scalable and maintainable software solutions.

EDUCATION

Telkom University (September 2022 – June 2026)

Software Engineering | GPA: 3.83 / 4.00

- Relevant Coursework: Programming, Database Systems, Web Programming Design, Operating Systems, Mobile Programming
- Thesis: Comparative Analysis and Performance Optimization of Express.js and Fastify Frameworks Under High Concurrent Request Conditions Using Load Testing Methods

Hacktiv8 (September 2024 – December 2024)

Frontend React JS Bootcamp | Final Score: 90

- Learned ReactJS fundamentals, including React Hooks, React Router, Params, React Redux, and more.
-

WORK EXPERIENCE

PT Ardata Digital Asia (Internship) | July 2025 – October 2025

Programmer

- Fixed bugs in database schemas containing thousands of records.
- Optimized rendering performance in React Native applications.
- Developed applications according to client requirements using Next.js, Laravel, and React.

PT Luzie Berkah Mandiri (Contract) | October 2025 – December 2025

Frontend Web Developer

- Built a modern, responsive, and scalable user interface using Next.js with a component-based architecture.
 - Integrated the frontend with backend services (REST API) to manage customer data, transactions, and business workflows in real-time.
 - Developed interactive dashboards to visualize customer insights, sales analytics, and business reports.
 - Developed reusable UI components such as forms, tables, modals, and other components to ensure UI consistency and improve development efficiency.
-

SKILLS

Programming Languages: JavaScript, Python, PHP, Dart, TypeScript, Golang, Java

Frameworks: Express, Next.js, Flutter, Fastify, Gin, Go Fiber, Laravel

Databases: Firebase, MySQL, PostgreSQL, MongoDB

Tools: AWS, Docker, Git, K6, Prometheus, Grafana, Linux, MS Word, MS Excel, Kubernetes, Midtrans

Communication: Active English (EPrT Score: 520)

PORTFOLIO

- **Food Booking App (Personal Project)**
Flutter based with Firestore Database for food ordering application with user and seller login systems and interactive navigation.
- **Waste Bank Management (Salem, Brebes, Indonesia)**
Web-based system using Native PHP with Bootstrap for UI and MySQL database to manage waste exchange transactions and community balances.
- **Company Profile (Muria Cellular)**
Company profile website using Native PHP with Bootstrap for UI and MySQL database with an admin panel and product catalog.
- **Eduline (PT Ardata Digital Asia)**
Backend API with Express.js and PostgreSQL for tutoring session scheduling and mentor payroll management.
- **Subscription API (Personal Project)**
Express.js API with MongoDB for user authentication and subscription management.
- **CRM Order Management (PT Luzie Berkah Mandiri)**
Developed a CRM frontend with Next.js for order management with REST API integration from an Express.js backend, multilingual support using i18next (Indonesian and English), user authentication, and a responsive interface using Tailwind CSS and Shadcn for managing orders and customer data.
- **Comparative Analysis And Performance Optimization (Thesis)**
Research project for analyzing and optimizing the performance of Express.js and Fastify REST APIs under high concurrent request conditions. The benchmark uses an e-commerce API scenario with PostgreSQL, Redis, BullMQ, k6, Prometheus, and Grafana, deployed and tested in an AWS EC2 environment to evaluate latency, throughput, error rate, and server performance.
- **Profile Website (Dekopinwil Jawa Tengah)**
Developed an institutional profile website using Next.js, Express.js, Tailwind CSS, PostgreSQL, JWT, and Drizzle, featuring an admin panel for content management, SEO optimization, JWT-based authentication, and a REST API backend for content management.
- **POS Laundry (Central Laundry Express Purbalingga)**
Developed Laundry POS backend with Express.js and PostgreSQL with multi-branch, membership, payment gateway with midtrans, monthly financial reporting, order statistics, service management, and a secure, scalable REST API.
